

Recombinant Trypsin

EDTA 1X in PBS w/o Calcium w/o Magnesium w/o Phenol Red

Description:

Biowest's Recombinant Trypsin is a genetically engineered protein expressed in Escherichia coli.

As such it is totally animal free and ready-to-use for cell culture applications. Free from contaminating enzymes like chymotrypsin as well as protein inhibitors. It is highly stable with a high purity > 95%.

- ◆ No risk of virus, BSE or other adventitious agents
- ◆ High purity
- ◆ High stability over 2 years
- ◆ Ready-to-use solution (1X) with Recombinant Trypsin and EDTA, without Calcium, Magnesium and Phenol Red

Product informations:

Frozen

-20°C

24 months

Applications:

Cell culture
