

Fetal Bovine Serum (FBS)

Ultra-Low Endotoxin

BOVINE

SOUTH AMERICA

Description:

Endotoxins, i.e. LPS for E.Coli, are components of the walls of Gram-negative bacteria. They are released when the bacterial cell dies. Their presence can interfere with biological parameters, as cell activation. Endotoxin-low FBS is used for LPS-sensitive cell lines, as macrophage and immune cells:

- ◆ Lower endotoxin level : $\leq 0,5$ EU/ml
- ◆ Triple 0,1 μ Filtered
- ◆ Virus & Mycoplasma Tested
- ◆ Ideal for sensitive cells & Applications

Product informations:

Frozen

-20°C

60 months

Ordering informations:

FBS Ultra-Low Endotoxin, South America Origin

S1860 - 100	100ml
S1860 - 500	500ml

Other packagings available on request

Other origins available on request

Applications:

Cell culture
Biotechnology research/production
Vaccine manufacturing
Cloning and animal diagnostics

Biowest performs a quantitative chromokinetic test, according to the European Pharmacopoeia Method D. This serum guarantees an endotoxin level ≤ 0.5 EU/ml.
