or

Product information

Frozen

-18°C to -40°C

60 months

Description

Fetal Bovine Serum (FBS) is obtained from aseptically collected fetal bovine blood after coagulation and centrifugation, followed by triple filtration through 0.1 µm filters. Rich in proteins, growth factors and attachment factors, it supports the growth, maintenance and adhesion of mammalian cells *in vitro*.

Biowest Premium FBS, available in South American and European origins, is selected from batches meeting stringent quality criteria for endotoxin, haemoglobin and cell growth performance.

Key Features & Benefits:

- Pre-selected batches to reduce time-consuming serum screening
- **Endotoxin level < 5 EU/mL**
- **Haemoglobin level < 25 mg/100 ml**
- **Growth promotion > 80%***
- High batch-to-batch consistency
- Selected for reliable cell growth performance

*Growth promotion tested on SP2/O-Ag14, HeLa, L929 and MRC-5 cell lines.

Applications

Cell culture
Biotechnology research/production
Vaccine manufacturing

Ordering information

FBS Premium, EU Origin

S140B-100	100 ml
S140B-500	500 ml

FBS Premium, South America

S181B-100	100 ml
S181B-500	500 ml
