

Fetal Bovine Serum (FBS)

Ultra-low Endotoxin

Description

Biowest Ultra-low Endotoxin Fetal Bovine Serum (FBS), sourced from South America, is specifically selected for cell culture applications requiring minimal endotoxin exposure.

Endotoxins, particularly lipopolysaccharides (LPS) from Gram-negative bacteria, can influence cellular responses, including immune cell activation. This serum is therefore particularly suitable for endotoxin-sensitive cell cultures, such as macrophages and other immune cells.

Key Features:

- Guaranteed **endotoxin level ≤ 0.5 EU/mL**
- Endotoxin testing according to European Pharmacopoeia Method D
- Triple-filtered through $0.1 \mu\text{m}$ filters
- Quality-controlled for mycoplasma, BVDV and cell growth performance

Product information

Frozen

-18°C to -40°C

60 months

Applications

Cell culture
Biotechnology research/production
Vaccine manufacturing
Cloning and animal diagnostics

Ordering information

FBS South America, Ultra-Low Endotoxin

S1860-100 100 ml

S1860-500 500 ml
